

Q1. Consider the context-free grammar $G = \langle \{X, Y\}, \{a, b\}, P, X \rangle$, with productions P:

$$\begin{aligned} X &\rightarrow YY \\ Y &\rightarrow bY \mid Yb \mid a \mid YYY \end{aligned}$$

- a. Show using derivation how the string *ababaa* can be generated by this grammar.

Solution:

- b. Construct a parse tree for this string.
